1. What Is CODA

CODA (Coach Observation Development App) is Football Victoria's shared workspace for Coach Education Tutors (CETs), Technical Directors, and administrators to observe, assess, and track coaches through both formal diploma pathways (C, B, A Diploma) and informal club sessions.

Everything in CODA — coaches, courses, CETs, observations, and completed-task tracking — is shared in real time across every signed-in user. There is nothing to install; CODA runs entirely in your web browser, on phone, tablet, or laptop.

What CODA covers

- **New Observation —** a guided, five-step process for recording a coaching-session observation, scoring it against the FA assessment rubric, and generating a development plan.
- **Completed Tasks —** attendance and coursework tracking for every coach on a diploma course, including bulk CSV import from course rosters.
- **Logistics —** your shared library of Coaches, CETs, and Courses/Workshops.
- **History —** every submitted observation, with filtering, PDF export, and admin tools.
- **CET Observation —** a separate assessment tool for evaluating a CET's own coaching-conversation and session-design practice.
- **RAPA —** Risk Assessment Process App, for session risk assessments and incident reporting.

2. Signing In

When you open CODA you'll be asked to sign in one of two ways. Everyone doing coach-observation work signs in as a CET; anyone managing the system signs in as an Admin.

Signing in as a CET

1. Tap “I'm a CET.”
2. Select your name from the list.
3. Tap Continue.

No PIN is required for CET sign-in. This gives you full access to New Observation, Completed Tasks, Logistics, History, CET Observation and RAPA.

Signing in as an Admin

1. Tap “I'm an Admin.”
2. Enter your admin name and 4-digit PIN.
3. Tap Sign In.

Three incorrect PIN attempts locks that admin name out for 30 minutes. Admin sign-in unlocks additional tools depending on your tier — see the table below.

Admin tiers

Tier	Scope	Can do
FA Admin (Master)	Everything, every Member Federation	Full access: add/remove any admin, Clear History, Remove All CETs, Merge Duplicates, Data Export/Import, Reset all PINs, set the total Admin Slots limit and the slot numbers for every role in every Member Federation, and set the Session Host.
MF Admin (TD/CEM)	One or more Member Federations	Clear History, Remove All CETs, Merge Duplicate CETs, Reopen Report and Export PDF — all scoped to their own MF(s). Can add Course Admins and MF Coordinators for their MF, and change the MF Coordinator and Course Admin slot numbers for their MF.
MF Coordinator	One Member Federation	Reopen Report, Export PDF, RAPA assessor management, and the Bin — scoped to their MF. Can change the Course Admin slot number for their MF. Cannot Clear History, Remove All CETs, Merge Duplicates, or add or remove other admins.
Course Admin	Specific course number(s), across one or more Member Federations	Reopen Report, Export PDF and update progress records for just their assigned course(s).

NEW *A Course Admin can now be assigned course access across multiple Member Federations, not just one — useful for a CET who works across MFs.*

NEW *The Master tier is now called FA Admin, and MF Admin is now labelled MF Admin (TD/CEM). Each role has its own colour and shape in the Admin screens — FA Admin blue ◆, MF Admin (TD/CEM) orange ▲, MF Coordinator green ■, Course Admin purple ● — chosen to be colour-blind safe. The shape and a tick on the selected role mean colour is never the only cue.*

3. Dashboard

The Dashboard is CODA's home screen: a snapshot of activity across every coach, plus quick access to anything in progress.

At a glance

- **Stat cards —** total Coaches Tracked, Observations Logged, and Courses in the Library.
- **Drafts —** any observation you've saved but not yet submitted. Tap Continue to pick up where you left off or Submit to send it straight to History.
- **Recent Observations —** coaches with at least one observation in the last few days, tap through to their full History.

NEW *Drafts and Recent Observations are now collapsed accordions with a count on the heading, matching Closed Courses below. Recent Observations now shows only coaches observed in the last 4 days, instead of a fixed top-5 list.*

NEW *Drafts can now be sorted A–Z by coach name or by date, via a small toggle above the list when it's expanded. Your choice is remembered against your own login and stays independent of anyone else's.*

NEW *A Share CODA with CETs card now sits under the stat cards. It shows a QR code that opens CODA (point a phone camera at it), a Share by email button that opens your email app with the link ready to send — add the recipients — and a Copy link button.*

Open Courses

Every course with at least one Completed Tasks record, grouped by Member Federation and course number. Expand a course to update attendance or Online Modules % for the whole group at once, or individually per coach. Close Course marks it closed and moves it to Closed Courses below.

NEW *Each Member Federation heading now shows its logo badge next to the name.*

Closed Courses

Coaches from a Closed Course — closing a course is a status flag (via Close Course, or automatically when the final diploma block is closed), not a guarantee everyone in it actually finished; that's what Outstanding Coaches below is for.

NEW *Renamed from "Completed Courses", since a closed course can still have coaches with outstanding items. Collapsed by default — tap the header to expand; it shows a running count (e.g. "12 courses"). Each course inside still expands individually to show its coaches, with a Reopen Course option if it was closed too early.*

Outstanding Coaches

Coaches from Closed Courses who still have outstanding attendance or coursework. Each course number is its own collapsible row — e.g. "#165 — AFC/FA C Diploma" with a red count badge ("3 incomplete") — tap to expand and see exactly which coaches and what's still needed for that course.

NEW *Renamed from "Incompleted Course" to better match what it actually shows.*

4. New Observation

New Observation is a five-step wizard. You can move forward with Next, jump back to any completed step by tapping its header, and Save & Return at any point to finish later as a draft.

Step 1 — Session Details

- **Coach —** search for an existing coach or add a new one on the spot.
- **Role —** Coach Education Tutor (CET) for formal sessions, or Technical Director / Coaching Coordinator for informal club sessions.
- **Date & Member Federation —** sets the logo shown on this report's PDF export.
- **Session type —** Formal course session (tied to a qualification) or Informal club session.
- **Course & Course Number —** select from the Course Library or type a custom qualification name. For B/A Diploma, also choose the Diploma Block — this is auto-suggested from the coach's on-file attendance.

- **Key Outcomes Focus —** pulls automatically from the coach's Individual Development Plan (IDP) if one is on file; you can view, edit, or upload their IDP document right here.

NEW *Uploading an IDP document (.docx or .pdf) now scans the extracted text for labels — Strengths, Performance Gap / Areas for Development, Goals/Plan, Mentor, Qualifications, Years Coaching — and auto-fills whichever of those fields are still empty. It only fills blank fields, so anything you've already typed is never overwritten. Always worth a quick check, since it's a best-effort match on common phrasing, not a guarantee.*

Step 2 — Session Plan

- **Session Topic —** from the coach's on-file topic list or type your own.
- **Session Objective and planning fields —** number of players, pitch size, additional areas, rules/constraints, and Type of Session (with Progressive / PPP sub-types where relevant).
- **Pitch Geography & Zones Used —** tap zones on the 18-zone pitch diagram to mark where the session took place; D3/M3/F3 labels update automatically.

NEW *Tap the D3, M3, or F3 badge itself to instantly select (or deselect) all six zones in that third, instead of tapping each zone individually.*

Step 3 — Assessment Scoring

NEW *The SO CHANGE IT checklist is now shown for C Diploma, Foundation courses, Workshops, and informal sessions only — it no longer appears for B or A Diploma observations.*

Score each of the six assessment areas — Objective, Content, Organisation, Presenting, Coaching, Motivational Climate — from 0 (Not Evident) to 3 (Expertise). A score of 0 or 1 requires a written evidence note before you can continue. The running total and a floating stopwatch are shown throughout. A General Notes panel stays pinned to the bottom of the screen for anything that doesn't fit under one specific area.

NEW *On mobile, the floating stopwatch and the General Notes panel now correctly track the on-screen keyboard — the stopwatch no longer disappears and the Notes panel repositions itself above the keyboard instead of being hidden behind it, so you can see what you're typing or dictating.*

Step 4 — Feedback

- **Strengths and Areas for Development —** free-text observations.
- **Additional plan notes for the coach —** required before the report can be saved and submitted.

Step 5 — Development Plan

- **Coach's Action Plan —** tap Suggest Actions to auto-draft three action items from the scoring, development notes, and plan notes — fully editable.
- **Assessment Outcome —** automatically follows the score (Highly Competent / Competent / Not Yet Competent) unless you override it manually.
- **Potential Future Pathways —** shown only when the outcome is Highly Competent. Options: Analyst, High-Performance Coach, S&C Coach

NEW *...and now CET (Coach Education Tutor), for a coach whose observation opens a future tutoring pathway.*

- **Assessor Signature —** auto-filled from the CET or Technical Director entered in Step 1; edit if needed.

Saving

- **Save & Return —** stores the observation as a draft. It won't appear in History until submitted.
- **Save & Submit —** finalises the report and sends it to History immediately.

5. Completed Tasks

Tracks attendance percentage and coursework completion for every coach on a course — separate from, but linked to, the observations recorded in New Observation. (In the app this screen is labelled Coaches Progress.)

Adding records

- **Add Record —** manually create or edit a single coach's tracking record, including the full coursework checklist for their diploma type.
- **Import Coursework CSV —** bulk-upload a course roster. CODA auto-detects attendance-day columns (date + session-number format), coach name, club, FA number, assigned CET, and — for B Diploma — each candidate's session topics. Then choose a checklist: Original columns (the standard fixed checklist) or Course specific (from the spreadsheet), where only Name and the attendance dates are required and every other column you leave ticked becomes a tick item titled with its header. Admin-type columns (email, phone, DOB, course/candidate numbers and so on) are unticked by default.

Coursework by Diploma type

- **C Diploma —** attendance plus a single Practical Session.
- **B / A Diploma —** attendance, four session plans (from the coach's topic list), Goalscoring Presentation, Game Plan, Analysis Session Plan, Annual Plan, 6-Week Cycle (with FC details), Online Modules, and Formative Assessment — plus a 25-Minute Coaching Session for B Diploma specifically.

A checklist item tied to a Not Yet Competent observation outcome is locked and cannot be manually ticked — it clears automatically once a passing re-observation is recorded. Next to each auto-ticked item (Practical Session for C Diploma, or the matching topic for B/A Diploma) a badge reads “Assessed: Competent” (or whichever outcome), making clear the tick came from a real observation rather than a manual check.

NEW *Submitting a formal-course observation now auto-creates the coach's Completed Tasks record for that course if one doesn't already exist, instead of silently doing nothing. Attendance and Online Modules % are left blank for you to fill in — only the assessed item itself is ticked.*

Progress Tracking & closing

For B/A Diploma courses, each block can be marked Tracking Ahead / As Expected / Needs Assistance. Provisionally Close a block once every candidate has moved past it; closing the final block also closes the course and opens its Course Report. A completed candidate on a B or C Diploma course can also be flagged Recommend for A/B Diploma, which surfaces on that course's Course Report.

NEW *Once a block is marked Tracking Ahead / As Expected / Needs Assistance, a small notes box now appears underneath it for that block specifically — type a note and tap away to save it. It stays hidden until a status is set and is locked whenever the block itself is locked.*

Correspondence

NEW *Each coach's record has a Correspondence section that opens once the course is over — when their attendance reaches 100%. Until then it shows as locked.*

- **Suggested email —** CODA works out which email the coach is due: outstanding items (listing exactly what is left to finish), a video resubmission request (if anything is Not Yet Competent), or course completed. Tap Copy email to copy the subject and text, then paste it into your email app.
- **Log email sent —** record each email you send with a type (Outstanding items, Course completed, Video resubmission, Extension / deadline, Other), a date (defaults to today) and an optional note. Entries show the date, type and who logged them, newest first, and can be removed.

CODA does not send email itself — the log is a record of what has been sent, so anyone looking at a coach's record can see what they have already been told.

6. Logistics

Your three shared libraries — CETs, Course & Workshop Library, and Coaches — live here, each collapsed by default. Every library supports Add, Bulk Upload (CSV), Export CSV, and duplicate detection with a Merge tool.

CETs

The dropdown list used throughout CODA. Each CET can be assigned one or more Member Federations and flagged as an Assessor to appear in the CET Observation tool.

Course & Workshop Library

Every course or workshop you can select in New Observation and Completed Tasks, tagged to the assessment area(s) it develops. Duplicate titles can be cleaned up in bulk, keeping whichever copy has the most detail filled in.

Coaches

The full coach roster, with club, coaching level, session topics, FA number, and Individual Development Plan (IDP) — including a PDF download of each coach's IDP. Coaches can be assigned Member Federation(s) manually, in bulk, or automatically backfilled from their existing course history.

7. History

Every submitted observation report, with a full filter bar: coach, CET, course number, course type, date range, outcome, and score range.

Viewing reports

Tap any report to open it in full. From there you can Save PDF, Print, or — for an already-submitted report — Reopen for Editing with admin authorisation scoped to that report's course.

Admin Settings

Available to signed-in admins via the Admin button. Contents scale with your tier (see the Admin Tiers table in Section 2):

- **Export / Import Data —** FA Admin only. Full JSON backup and restore, additive on import (never deletes anything not in the file).
- **Clear History —** FA/MF Admin (TD/CEM). Permanently deletes observations — scoped to your own Member Federation(s) for MF Admin (TD/CEM).

- **The Bin —** deleted coaches, CETs, observations, and completed-task records are recoverable here for 30 days before permanent removal.
- **Admins —** add, remove, and manage PINs for other admins (scoped by tier); set the Session Host (the one FA Admin who can exclusively lock the Admin Settings panel while working); adjust the total Admin Slots limit.
- **Adding an admin —** NEW: the name box is a search over your current CETs. Start typing, then tap a CET to fill the name (CETs who are already admins are left out). To add someone who is not a CET, type their name and choose "+ Add 'Name' as a new person (not a CET)" — they are added as an admin only.
- **Slots per Member Federation —** NEW: each Member Federation has its own number of slots for MF Admin (TD/CEM), MF Coordinator and Course Admin, shown with how many are in use (defaults: 1, 1 and 4). You only see the slot numbers you can change: FA Admin sees and changes all of them for every federation; MF Admin (TD/CEM) sees the MF Coordinator and Course Admin numbers for their own federation; MF Coordinator sees the Course Admin number for their own federation. A number can't be set below how many are already in use. The total Admin Slots limit (FA Admin only) still applies on top, so raise it too if you need more admins overall.
- **Export PDF —** a single HTML export covering every observation and Completed Tasks record you have access to, ready to print or save as PDF.

8. Reports & PDF Exports

Three kinds of PDF can be generated from CODA: a single observation report, a candidate's full observation history, and a course report (all candidates or outstanding-only).

NEW *PDF export has been substantially improved.*

- **Real page margins —** reports now have proper margins on every page instead of printing edge-to-edge.
- **No more split cards —** a candidate's card in a Course Report, an assessment-area card, or the pitch-zone diagram will never be cut across a page break — the whole element moves to the next page instead.
- **Repeating header —** the course or coach name, Member Federation logo, and a status badge now appear at the top of every page, not just the first.
- **Course Reports now carry a header too —** matching the same style as candidate and single-observation reports.

9. CET Observation

A separate assessment tool for evaluating a CET's own coaching-conversation and session-design practice — distinct from the coach observation rubric used in New Observation.

What's assessed

- **GRIP —** Goals, Reflect/Review, Input, Plan — rated Strong / Developing / Needs Attention with evidence.

- **SO CHANGE IT —** rated as Referenced and applied effectively / Partially evidenced / Not evidenced against the candidates.
- **Coaching Frameworks —** Coaching Process and Session Design (5 R's), shown only for Diploma-level courses (C, B, A).
- **Feedback, Outcome & Action Plan —** WWW/EBI-style feedback, an overall outcome, a free-form action plan table, and sign-off with CET acknowledgement.

Managing Assessors

Only CETs flagged as an Assessor (set in Logistics → CETs) appear in the Assessor dropdown. Managing assessors and exporting CET Observation history both require MF Admin (TD/CEM) or MF Coordinator (scoped to their MF) or FA Admin authorisation.

10. RAPA — Risk Assessment Process App

Session-level risk assessments and incident reporting, sharing CODA's CET list.

New Risk Assessment

Fill in session details, then add hazards from a nine-category catalogue — each with standard typical hazards, controls, and initial/residual ratings pre-filled. If the standard information doesn't fit the situation, flag it with your own account and suggested rating; this is submitted for Executive Manager (FA Admin) review rather than applied immediately.

Report Incident

An eight-section incident report covering course details, the people involved, what happened, injury details (if applicable), witnesses, immediate action taken, and sign-off. Dates use a masked DD/MM/YY format and times a 12-hour am/pm format.

Admin area

FA Admin only. Reviews flagged hazard proposals (approve with or without updating the catalogue, or reject), tracks equipment restock reminders raised from incident reports and edits the hazard catalogue directly.

11. Admin Tiers — Quick Reference

Action	Course Admin	MF Coordinator	MF Admin (TD/CEM)	FA Admin
Reopen Report / Export PDF (own scope)	Yes	Yes	Yes	Yes
Update progress	Yes (assigned	Yes (own MF)	Yes (own MF)	Yes

Action	Course Admin	MF Coordinator	MF Admin (TD/CEM)	FA Admin
records (own course / MF)	course)			
RAPA assessor management	—	Yes	Yes	Yes
Clear History / Remove All CETs / Merge Duplicates	—	—	Yes (own MF)	Yes
Add Course Admins / MF Coordinators	—	—	Yes (own MF)	Yes
Change Course Admin slot numbers	—	Yes (own MF)	Yes (own MF)	Yes (all MFs)
Change MF Coordinator slot numbers	—	—	Yes (own MF)	Yes (all MFs)
Change MF Admin (TD/CEM) slot numbers and total Admin Slots limit	—	—	—	Yes
Add/remove any admin, Data Export/Import, PIN reset	—	—	—	Yes

12. Tips

- Save & Return often — an observation in progress is saved as a draft the moment you tap it, so you can always pick up later from the Dashboard.
- The floating stopwatch on the Assessment Scoring step is for your own timing use only — it isn't saved with the report.
- Deleted a coach, CET, or observation by mistake? Check the Bin under Admin Settings → History — everything is recoverable there for 30 days.
- If a course number is missing from a Completed Tasks record, it won't show up under Open/Completed Courses or auto-fill in New Observation — add it via the bulk Course Number tool on the Completed Tasks screen.
- To get new CETs into CODA quickly, use the Share CODA card on the Dashboard — they can scan the QR code, or you can email them the link.
- For questions, suggested changes, or anything not covered here, contact craigianmoore@gmail.com
